PROFESSIONAL SUMMARY

Creative full-stack software engineer with 3+ years of experience designing, building, and shipping production-grade web platforms. Specialized in payment infrastructure (Stripe, Paystack), AI-powered features, real-time collaboration tools, and SaaS scheduling systems. Proven track record of diagnosing production bugs, optimizing performance, and deploying scalable applications on Vercel serving real users.

WORK EXPERIENCE

Founder & Fullstack Developer

2023 — Present

Pxxl Space

PH, Nigeria

- Built and deployed Pxxl Book — a full-stack SaaS scheduling platform handling Stripe payments, Google Calendar OAuth 2.0 sync, Zoom/Meet integrations, and 50+ locale i18n.
- Designed PostgreSQL schema with optimized indexes serving 1,000+ booking transactions with sub-100ms query times.
- Engineered the end-to-end booking flow: availability detection, Stripe checkout, webhook verification, calendar creation, and confirmation email.
- Managed the full development lifecycle across 3 client projects simultaneously — from schema design to production deployment on Vercel.

Frontend Developer

2025 — Present

Steadfast International

Lagos, Nigeria

- Leading PWA e-commerce platform engineering — offline support via service worker caching, affiliate dashboard with real-time analytics.
- Optimized mobile-first React UI achieving <2s initial meaningful paint via lazy loading, code splitting, and image optimization.
- Built a real-time inventory management dashboard reducing stock discrepancy resolution from hours to under 5 minutes.
- Implemented role-based dashboards for 3 user tiers (admin, affiliate, customer) with granular access control.

Fullstack Developer

2024 — Present

Indulgetix

Lagos, Nigeria

- Architected a RESTful backend handling 10,000+ concurrent ticket bookings with <200ms API response times under load.
- Built a payment pipeline integrating Paystack — processed 5,000+ transactions with automatic reconciliation and refund handling.
- Designed a PostgreSQL database with 15+ relational tables supporting event scheduling, ticket inventory, and attendee management.
- Developed real-time admin dashboards showing live ticket sales, event capacity, and revenue analytics for event organizers.

SELECTED PROJECTS

ShopMate — Full-Stack E-Commerce Ecosystem

2025 — 2026

Production app: shop-mate-six-azure.vercel.app

- Built a production e-commerce platform with Stripe payment processing, OpenRouter AI natural-language search, and secure JWT authentication.
- Engineered a full-featured admin dashboard with Recharts real-time analytics, role-based access control, and Cloudinary media management.
- Designed a RESTful API with Express, PostgreSQL with optimized indexes, and AI-powered product search in a 3-deployment monorepo.

Stack: React.js, TypeScript, Vite, TailwindCSS, Node.js, Express, PostgreSQL, Stripe, OpenRouter AI, Cloudinary

Pxxl Book — SaaS Scheduling Platform

2026

Production app: pxxl-book.vercel.app

- Full-featured scheduling platform with Stripe payment processing and webhook handling.
- Integrated Google Calendar API with OAuth 2.0 for real-time calendar sync and availability management.
- Configured Zoom / Google Meet video integrations with automated meeting-link generation and 50+ locale i18n.

Stack: Next.js, React, TypeScript, PostgreSQL

Spotify Taste Profile — Data Visualization

2026

Production app: spotify-profile-full.vercel.app

- Diagnosed and resolved a cascade of production bugs caused by Spotify API deprecations (audio-features 403 for unverified apps).
- Built a genre-to-audio-features estimation engine as a drop-in replacement, restoring all chart rendering without changing the API contract.
- Achieved 13/13 Playwright integration tests with full canvas rendering, stat grid, personality card, and listening habits charts.

Stack: React.js, Chart.js, Styled-Components, Playwright

Daniel Board — Collaborative Whiteboard

2026

Production app: daniel-board.vercel.app

- Customized and deployed Excalidraw with custom branding, PWA configuration, and Firebase real-time backend.
- Configured Workbox service worker for offline caching, automatic updates, and full PWA support.

Stack: React, TypeScript, Vite, Excalidraw, Workbox, Firebase

george-daniel.vercel.app

- Built with Next.js 16 App Router and Tailwind CSS v4 — 95+ Lighthouse performance score, SEO best practices, and Framer Motion animations.

Stack: Next.js, TailwindCSS, TypeScript, Framer Motion

TECHNICAL SKILLS

Frontend

HTML, CSS, TailwindCSS, JavaScript, TypeScript, React.js, Next.js, Redux, Framer Motion, Chart.js, Styled-Components, Recharts

Payments & Integrations

Stripe API, Google APIs, Paystack, Nodemailer, Axios, Clerk Auth

Backend & Database

Node.js / Express, Python, PostgreSQL, SQL, MongoDB, Prisma, REST APIs, OAuth 2.0

DevOps & Design

Git, GitHub, Docker, Vercel, Postman, Figma, Playwright, Cloudinary
